

Egregor ransomware: Gone but not forgotten

Ransomware groups are coming and going faster than ever. In June alone, we saw Avaddon release its decryption keys unprompted and disappear from sight, while members of CLOP were arrested in Ukraine. The move follows increasing pressure from the U.S. intelligence.

Understanding the matrix for APC improvements

More agile tools are helping multivariable control become more effective for advanced process control and other applications than traditional model-based control (MPC) and real-time optimization. Process engineers, operations personnel, DCS and APC engineers, and other process operation and optimization stakeholders benefit from understanding the matrix.

- Allan Kern

Effective process control system migration, Part 1: Planning advice

Examine how to manage DCS migration preparation with front-end loading design goals. A new DCS with high-performance human-machine interface (HMI) can help operators resolve abnormal situations 41% faster.

- Lynn Njaa
